

NEEDLE IN A HAYSTACK

When it comes to filling your sales pipeline, it can be difficult to find the right prospects at the right point in their buying cycle. That's where the OPEX Exchange comes in...

Traditional Event

Exchange Model

Finding a needle in a haystack

Your pick of the bunch

Waiting around for the right prospect to find you in a sea of vendors

Pre-arranged meetings with pre-qualified attendees you want to meet with and who want to meet with you!

Presentation, after presentation, after presentation...

Closed door, engaged boardroom environment

And you walk away with stacks of business cards but no real leads

And you have follow up meetings secured for when you're back in the office
