

LIMA`19 Air Chiefs' Conference

The Royal Malaysian Air Force's Air Chiefs' Conference (ACC) will be held on 27 March 2019, in conjunction with LIMA`19. The theme for the next edition of the conference will be '**Information Operations and UAS in Complementing the Evolution of Aerospace Power – A Future Regional Strategy**'. It is with great honour and pleasure that I invite you to participate in this event.

The Air Chiefs' Conference will offer the ideal platform for the international and regional's air commands to revisit the scenario surrounding the changing role of the Air Force in today's digital environment via a constructive dialogue. The ACC has grown over the recent years and has become institutionalised. This conference is proving to be an effective instrument in maintaining security cooperation and developing better rapport among the air forces.

Featuring over 30 Air Chiefs, the purpose of this dialogue is to examine how air operations can be enhanced through the use of technology to fulfill strategic, operational and tactical requirements. Drawing from operational case studies in modern day theatres, the conference will also provide a good platform to engage few key organisations from the defence industry to add a fresh perspective to this issue as well as offer an excellent platform for networking.

The Royal Malaysian Air Force (RMAF) has nominated and is working together with International Quality Productivity Centre (IQPC) to finalise the details of the conference, and IQPC will be glad to update you with further information later. Please confirm your participation to them at the earliest.

I truly hope to see you at the LIMA`19 Air Chiefs' Conference, and look forward to welcoming you there on the day itself.

With Warm Regards,

General Tan Sri' Dato Sri Affendi bin Buang RMAF.
Chief of Air Force.
