10:25	**Solution Provider Spotlight**
10:50	**Australian Teletrial Program** **How You Can Foster & Fast Track Clinical Innovation By Making Clinical Trials Accessible Through Telehealth Technology** Queensland Health is leading a national program to expand the reach of clinical trials Australia-wide through digital telehealth technology. This presentation will discuss the implementation of the Australian Teletrial Program and its impact on rural, regional and remote clinical trial sites across Australia. More importantly, it will show you how your health service can bring the value of this capability to your health service and your community. • Leveraging digital telehealth technology to create an interconnected network of clinical trial sites • Ensuring equitable access to care for regional patients, improving their health outcomes and quality of life • Expanding the reach of clinical teletrials with a $75 million investment from the Commonwealth Medical Research Future Fund • Building on the program's success, the ATP has set a target of 5000 new rural, regional and remote clinical trial participants, 2400 new clinical trial sites, 90 new general practice clinical trial sites, 208 new trials and 5000 people trained to facilitate these services. Kaye Hewson, Director, Australian Teletrial Program, **Queensland Health**
11:15	**Solution Provider Spotlight**
11:50	Event Closing Remarks from the Conference Chair
