TWO WAYS WE'RE CHANGING
MOBILITY FOR RETAIL:

YOUR COMPANY'S
SYSTEMS-OF-RECORD

JOURNEYAPPS
CUSTOM MOBILE SOLUTIONS
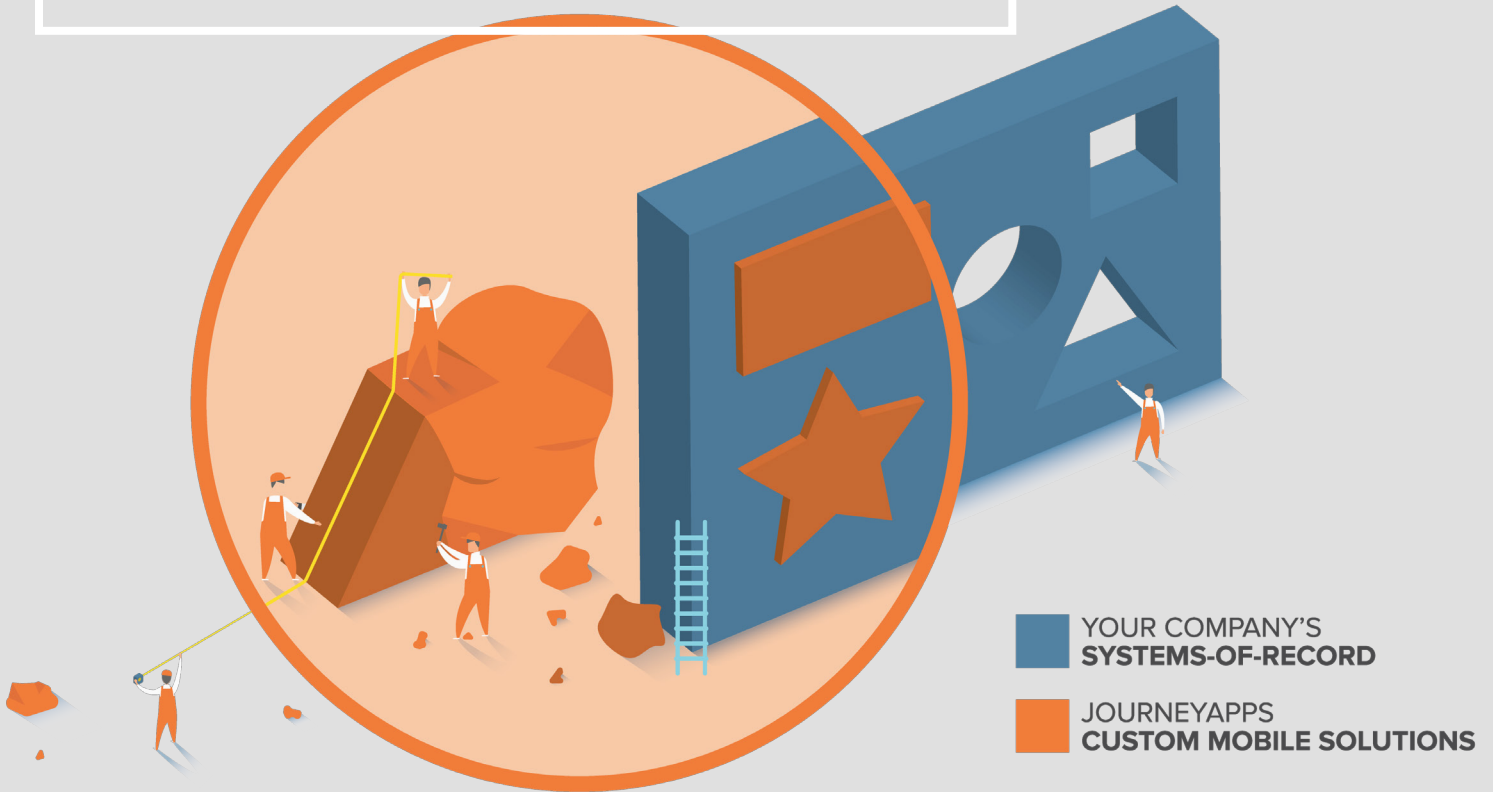

1. CONNECTING SYSTEMS-OF-RECORD
2. RAPID CUSTOM EXTENDIBILITY

ERP, Accounting, Payroll, POS, CRM, IoT — the list of systems that top performing retailers use has grown drastically over the past decade. The problem for the employee on the ground, however, has remained the same: how to execute duties with minimal wasted effort.

Employees of today are required to be professional software users; jumping from ERP to Accounting to shared collaboration tools multiple times every day. While this ensures that records are kept up to date, it's of little help if it keeps employees from doing their jobs.

JourneyApps provides an answer: custom apps (mobile and desktop) that guide employees through processes and automatically get the required information back to all the systems-of-record that need to be updated and kick-off follow-on processes.

We'll solve your immediate need, fast (and include unlimited updates to extend solutions as you realize what's needed next).

JOURNEYAPPS
CUSTOMER SUCCESS STORIES

SHOPRITE

JourneyApps allows **Shoprite** Area Managers to conduct Brand Standard Audits across its 178 fast food outlets and updates their Business Intelligence dashboards in real time.

IMMEDIATE NEED:
Brand Standard Compliance

CUSTOM EXTENSION:
A Training Assessment process that confirms employee certification and updates payroll systems.

Pick n Pay

Pick n Pay's Store Execution Team uses a custom JourneyApps solution to report incidents over its network of over 1400 stores and kick-off maintenance, merchandising and stock-taking processes.

IMMEDIATE NEED:
Incident Reporting

CUSTOM EXTENSION:
Job card creation, maintenance scheduling, team communications.

W WOOLWORTHS

With a custom Quality Audit app, staff in 3 **Woolworths** distribution centers serving a network of over 220 upmarket stores perform daily quality control audits and update stock levels on ERP as well as send automatic exception reports to Procurement.

IMMEDIATE NEED:
Auditing supplier stock

CUSTOM EXTENSION:
Admin user role for management spot checks.

takealot.com

JourneyApps helped online retail giant **Takealot.com** implement a custom Proof of Delivery app that allows drivers to record goods picked-up, mark them as on their way, navigate to delivery addresses and get delivery acceptance from customers.
